## Summary

I am a seasoned front end developer with 6+ years industry experience who loves to bring visual design to live. I enjoy building beautiful and functional web applications.

My skill set includes HTML5, CSS3, Sass, JavaScript and Angular. I have gained expertise in responsive design. With every line of code, I try to make application more lively and interactive.

## Experience

### Senior Frontend Developer

Koder

Jun 2019 - Present (1 year 9 months +)

1. Worked on building a learning portal called 'U' which allows different instructors to create free/paid courses and teach students. Students can find a variety of courses to enrol.

- Worked on building complete responsive pages
- Involved in writing SQL queries and integrating backend with frontend
